**QUALITY
MADE IN GERMANY**

The high-quality products of kugelmann are manufactured in Rettenbach am Auerberg, a village embedded into the foothills of the Alps, not far from famous Neuschwanstein Castle.

We are constantly looking for the best. We are firmly focused on the future. And we promise to passionately use our know-how in innovative engineering and our demand for perfect workmanship. Until the last detail is perfect. Until the finishing touch makes a machine a unique one: a kugelmann machine.

Sepp Kugelmann

THREE-POINT REVOLUTION

There has never been anything like this before. Our new three-point spreaders D301 and D601 are a true innovation.

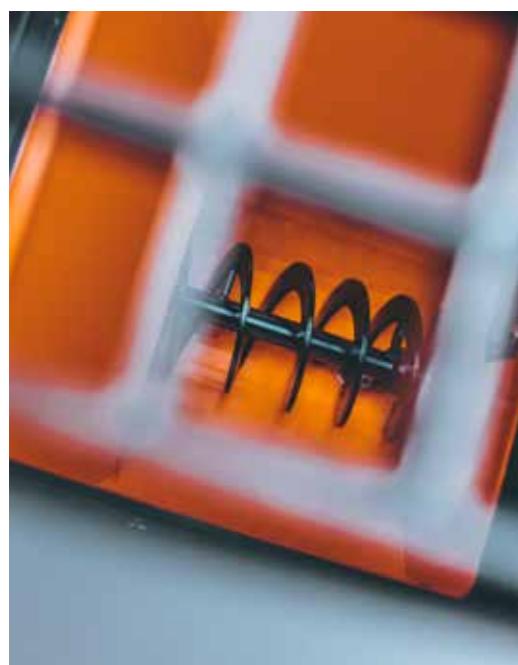

The innovative material combination of stainless steel and high-quality plastic is unbeatable what concerns durability and reliability. In the past decades, kugelmann has continuously developed the spreading technology for winter maintenance, always with great attention to detail and keen on offering the best quality. The combination of high-quality materials and established and proven technology has led to a new era of one-chamber three-point spreaders - launched by kugelmann.

See for yourself. The following pages provide more details on the three-point spreaders D301 and D601.

D 301 | D 601

The new generation of one-chamber three-point spreaders by kugelmann

bottom left:
kugelmann screw conveyor

bottom right:
manual adjustment of spread width/density

MAXIMUM PAYLOAD

center of gravity close to vehicle
low net weight

DIVERSE SPREADING MATERIALS

optional agitator shaft, does not require an additional hydraulic unit

INNOVATION THAT MATTERS

kugelmann spreading disc: patented and proven homogeneous spread pattern
exact lateral distribution of spreading material
maximum spreading capacity
maximum road safety

TARPAULIN COVER

simple and reliable handling

DRIVING SAFETY

compact attachment to carrier vehicle

SIMPLICITY

manual operation also without control unit intuitive handling

SCREW CONVEYOR

exact dosing accuracy
proven design, durable construction
maximum spreading capacity

PARKING STAND

easily collapsible
safe position

MANY EQUIPMENT OPTIONS

intelligent and user-friendly control unit
splash guard
reversal of screw movement
flasher and rotating beacon
power take-off pump
agitator shaft
warning sign
camera set

COST-EFFECTIVENESS

exact dosing accuracy, thus environmentally conscious handling of spreading material
low oil consumption and low pressure and power requirement through highly efficient hydraulic block

UNBEATABLE DURABILITY

innovative material combination
stainless steel + plastic
maximum corrosion protection

„D“ means three-point spreader

D 601

600 l

One-chamber spreader

D 301

300 l filling capacity

depth 82 cm, width 108 cm, height 120 cm

178 kg net weight

D 601

600 l filling capacity

depth 82 cm, width 135 cm, height 130 cm

223 kg net weight

„A real milestone in the three-point spreader segment“

The innovative material combination of stainless steel and plastic combined with proven kugelmann technology and ingenious details are the basis for our new three-point spreader generation.

Once more, we have turned everything upside down, questioned every stage of development and have gone our own way.

The basis, i.e. the complete base including the technical inner workings is produced of stainless steel. The high-quality plastic tank is made by rotational moulding. Thus, we manage to produce a highly economic spreader with a very long service life.

The low net weight means low fuel consumption and the possibility of maximum load.

The configuration of a simple basis machine up to a spreader fully equipped according to your requirements and needs - everything is possible thanks to the thought-out modular design.

Detail solutions such as the specifically developed highly efficient hydraulic block complete the machine and make it a real milestone.

Sebastian Kugelmann

INNOVATION THAT MATTERS

We have been building spreading machines since 1980 - with the highest quality requirements from the beginning. Over the past decades, the kugelmann spreading technology has been continuously improved and perfected.

Through the exact and consistent lateral distribution of spreading material, we reach a homogeneous spreading pattern. This means reliable spreading and thus road safety.

K-BASIC 2

With the K-BASIC 2, kugelmann has managed to launch a control system reduced to the most essential. As an interface between operator and machine, the control system combines intuitive operation and precise spreading technology. Despite the high tech solution with intelligent feedback and control function, the K-BASIC 2 is easily understandable and its use quickly becomes routine. You have everything under control without compromising on your work.

The control system works entirely path-dependent. This means an economical and efficient use of spreading material.

A unique feature of our spreaders is the infinitely adjustable spread pattern. Even more convenient by means of electronic adjustment or even through dynamic stabilisation of the spread pattern.

Control system K-BASIC 2

K-TRONIC 2

The control system K-TRONIC 2 leaves nothing to be desired. Based on the K-BASIC 2, the K-TRONIC 2 offers several special functions as for example a data recording feature for archiving of spreading data or GPS data. These data can be imported into software systems of different manufacturers or may be processed in the kugelmann software solution K-CENTER (included in delivery scope)

This is not all, however: choose your infinitely variable spread width or adjust the spread pattern in an asymmetric way, e.g. for spreading along the kerbside and mix your spreading material in any proportion.

EVERYTHING IS POSSIBLE

The basic version of the spreader also works without control system. Accordingly, the entry price is fairly low.

Optionally, the K-BASIC 2 or the K-TRONIC 2 may be ordered as „remote control unit“ or may be refitted.

winner 2016

D 301 | D 601

The new generation of one-chamber three-point spreaders by kugelmann: A real milestone.

A 201 - A 1501

The new one-chamber truck-mounted spreader by kugelmann: revolutionary and trend-setting – a real innovation on the market.

KS 1200 | KS 1600

The kugelmann sweeping suction combination: reliable, simple and extremely effective.

L 411 - L 1551

Three-point spreader series with self-loading function: revolutionary thanks to the pivoting hopper

D DUPLEX

Two-chamber three-point spreader: the absolute multi-talent

A DUPLEX

kugelmann two-chamber truck-mounted spreaders: established and proven reliable for decades.

SNOW PLOUGHS

Smooth snow clearing: kugelmann snow ploughs stand for clean snow removal without damaging roads and tracks.

WE LOVE SNOW BUT NOT ON THE STREET
